

Summary of Findings

This report summarizes the key insights, customer retention analysis, and strategic recommendations for Alt Mobility based on an in-depth analysis of customer orders and payment data using SQL and Power BI.

Key Insights from SQL Queries

- **Order and Revenue Trends :**
 - There is a high concentration of completed orders in recent months, indicating improved operational efficiency.
 - Most revenue comes from successfully completed orders, though a notable portion of orders remains pending or failed.
- **Sales by Order Status :**
 - Completed orders contributed over 80% of revenue.
 - 'Failed' and 'Pending' statuses reveal areas needing attention in operations or customer experience.
- **Repeat Customers :** Roughly 40% of customers placed more than one order, highlighting a moderate retention baseline.
- **Payment Behavior :**
 - Over 70% of transactions are marked as Paid, but 30% remain Pending or Failed.
 - Many failed transactions are associated with specific customers or payment types, suggesting scope for intervention.
- **Temporal Patterns :** Monthly breakdowns indicate peaks in order volume during certain months, potentially tied to promotional periods.

Customer Retention Analysis

- **Cohort-Based Retention :**
 - Retention drops sharply after the first month, with less than 20% of customers returning by the third month.
 - Customers acquired during promotional months showed marginally better retention.
- **Retention Matrix :**
 - The retention matrix shows that most customers engage within their acquisition month.
 - Little cross-month engagement without targeted incentives.
- **Retention Strategy Implications :** The drop-off in subsequent months highlights the need for engagement and reactivation campaigns.

Recommendations

- **Improve Payment Processes :**
 - Streamline failed transactions by improving error handling and providing alternative payment options.
 - Automate follow-up reminders for pending transactions.
- **Strengthen Retention Tactics :**
 - Launch loyalty and rewards programs to incentivize repeat behavior.
 - Offer personalized discounts for second or third orders.
- **Leverage Peak Months :** Capitalize on high-volume months with targeted promotions and campaigns to retain first-time customers.

- **Segment and Target Users :**

- Use clustering on high-LTV (lifetime value) customers to inform campaign strategies.
- Identify churn-risk customers using order intervals and payment delays.

- **Visual & Reporting Improvements :**

- Build automated dashboards to track payment statuses and order fulfillment daily.
- Share insights across ops and customer support teams to enable proactive decision-making.
